

## Lyme Diagnosis: Contribution of Clinical Data Analysis by Machine Learning Work in Progress

**Shawky M**.<sup>(1)</sup>, Guérin M.<sup>(2)</sup>, Maffucci I.<sup>(2)</sup>, Zedan A.<sup>(3)</sup>, Octave S.<sup>(2)</sup>, Avalle B.<sup>(2)</sup> and Padiolleau-Lefèvre S.<sup>(2)</sup>

(1) – COSTECH laboratory, Université de Technologie de Compiègne, France (2) - GEC Laboratory, Université de Technologie de Compiègne, France (3) - Polyclinique Saint Côme, Compiègne, France

## Database constitution

- Patient clinical data
  - Clinical signs as expressed by patients (30%)
  - Symptom: intensity, frequency, evolution
  - Blood biochemistry
  - Overall serological status (Borreliosis, HCV, HSV, HIV, etc.)

Symptomes	Fréquence	Inte
Fatigue anormale	Permanent	Ext
Poussées de fièvre inexpliquées	Permanent	Ext
Sueurs nocturnes	Permanent	Ext
Maux de tête	Permanent	Ext
Baisse de la vision ou vision floue	Permanent	Ext
Vision double	Permanent	Ext
Photophobie (gène oculaire à la lumière)	Permanent	Ext
Acouphènes (bruits dans les oreilles)	Permanent	Ext
Vertiges ou troubles de l'équilibre	Permanent	Ext
Troubles de la concentration, brouillard cérébral	Permanent	Ext
Troubles de la mémoire	Permanent	Ext
Irritabilité	Permanent	Ext
Anxiété anormale		

- Machine Learning Challenges
  - Combining subjective and quantified numerical data
  - Learn also physician former decisions
  - Challenge: Incomplete data

## Machine Learning process
